BURGER KING®'s priority is to ensure customers with food allergies and intolerances have accurate information to enable them to make safe choices from our menu. There are 14 legally specified food allergies and this table states which products contain or may contain them as follows:

● Contains – a planned ingredient which is definitely present.

☐ May contain – a supplier has reported to us a real risk of cross contamination on their production line.

• May contain via shared equipment – potential cross contamination through shared cooking equipment in our kitchen (fryers & flame grilling equipment – broiler).

BURGER KING® kitchens have strict controls in place to reduce the risk of cross contamination such as separate storage areas, utensils and cleaning equipment for products containing allergens. In common with other catering operations, our kitchens are open environments, hence we cannot guarantee that any product is entirely free from any allergen. Customers with severe food allergies should take this information into account.

The allergen information for dip pots is printed on the lid and the allergen information for sauces on sachets is printed on the sachet. The allergen information for products in retail packaging (porridge, juices bottled and water bottled) is printed on the packaging.
